MAN Truck & Bus – a member of the MAN Group

# MAN PROFIDRIVE® INCREASED EFFICIENCY WITH SAFETY

# DRIVING ECONOMICALLY AND PROTECTING THE ENVIRONMENT.

The most effective accident prevention system is behind the steering wheel – the driver. It is important for the driver to drive with foresight, remain calm and confident in critical situations, and stay in control of the vehicle.

For this reason, MAN offers practical training courses for truck and bus drivers – and has been striking more and more of a chord with customers with its range of available seminars. MAN ProfiDrive® is now offering its services in more than 25 countries, currently employing a total of 69 trainers.

By professionals for professionals: The objective is to achieve a reduction in fuel consumption of up to 10% and promote gentler vehicle handling on the road.

# MAN DRIVER TRAINING: MAN PROFIDRIVE®.

Under MAN ProfiDrive®, you will find a comprehensive range of seminars on topics relating to driving behaviour, driving safety and economical driving. All courses are specially aimed at the following groups: Truck drivers, bus drivers, fleet managers, vehicle transfer personnel, driving instructors and specialists.

## During the course you will find out:

- how your behaviour and correct serving of the vehicle can keep tractive resistances down
- how you can match your driving style to the performance characteristics of the engine
- how to make optimum use of the kinetic energy of your vehicle
- how to exploit all possibilities of saving fuel
- how to make optimum use of the modern MAN gearboxes
